COVER LETTER

Mohammad Hashem Hanifi

3rd Macrorayan, Kabul Afghanistan

e-mail: hashimhanify@gmail.com

Phone: +93 (0) 731 111 533

After seeing your vacancy for a Backend Developer, I became very interested in contacting you to apply for this position. I appreciate that your organization values software architecture and robust backend systems as I noticed through the job description.

With over 3 years of experience as a Backend Developer specializing in RESTful API development, I have been building secure, scalable, and maintainable server-side applications using NestJS and MongoDB (Mongoose). My background includes implementing modern authentication flows (JWT with refresh token rotation), managing complex data operations with MongoDB aggregations, and designing modular, well-tested APIs to power high-performing frontend experiences.

You will find from my resume that I bring a strong understanding of web security, data modeling, and backend architecture. I am passionate about writing clean, testable code and building backend services that are efficient, resilient, and easy to integrate with modern frontend frameworks like React/Next.js.

I believe my technical skills and dedication to quality backend development will allow me to make meaningful contributions to your team. I would be honored to bring my backend expertise to your organization and help power your products from behind the scenes.

Please feel free to contact me at any time by phone at **+93 731 111 533** or by email address through **hashimhanify@gmail.com**. I look forward to the opportunity to discuss how I can contribute to your backend development designation.

Sincerely,

Mohammad Hashem

MOH. HASHEM HANIFI

BACKEND DEVELOPER

EDUCATION

Kabul University
2016 - 2020 // Kabul, Afghanistan
Bachelor Degree

DEVELOPMENT SKILLS

Backend

Programming Languages
JavaScript, TypeScript

Libraries & Frameworks
Nest.js, Express.js, NodeJS,

Databases
Mongodb, Postgresql (Basic)

ORMs
Mongoose

Tools & Platforms
Git, Github, Docker, CI/CD pipeline
Github Actions, Docker

Frontend

Programming Languages
JavaScript, TypeScript

Libraries & Frameworks
React.js, NextJS, Zustand (state mgmt)
ManitneUI, MaterialUI, Tailwindcss.

NETWORK CERTIFICATES

CompTIA Network +
Zoombyte technology center.
2019

CCNA Routing / Switching
Zoombyte technology center.
2019

INTERESTS

Art, Reading, Research, Practicing
Algorithms

EXPERIENCE

Backend developer @ Listoli (remote)

Jan 2023 - Present // Kabul, Afghanistan

- Defining clear and consistent endpoints that follow REST principles and resource-based architecture.
- Implementing token-based auth systems like JWT, OAuth to protect routes and user data.
- Use techniques like pagination, caching, indexing, and query optimization to improve response times and scalability.
- Provide informative error messages and maintain logs for debugging.
- Implementing CI/CD workflow on github for running tests & deployment.

Backend Developer @ Durreen

Nov 2024 - Present // Kabul, Afghanistan

- Implementing of Restful API with nestjs and mongodb.
- Creating consistent and predictable endpoints for CRUD operations.
- Ensuring separation of concerns between different modules (auth, user, order, products, etc.)
- Following RESTful principles in API route naming and method usage.
- Implementing JWT-based authentication and authorization.
- Implementing route guards and validation for protected routes.
- Integrating Mongodb Atlas full text search functionality with the API.
- Integrating Mongodb aggregation pipeline framework for better performance on API features like sorting, pagination, filtering ....
- Implementing CD with Render platform & CI in github Actions.

IT Manager @ HGML (Habib Gulzar Motors LTD)

Sep 2022 - Presents // Kabul, Afghanistan

- Align IT with Business Goals
- Ensure System Availability and Performance
- Safeguard Data and Infrastructure
- Risk Management and Compliance
- Team Management
- Monitoring and Reporting
